Subject
Invitation Letter of Professor Bruno Briseghella

Dear Prof. Bruno Briseghella,

On behalf of Deltares and following the discussion about possible collaborations with Dr. Martinelli, I am very glad to invite you as Dean of the College of Civil Engineering and as a well-known expert on infrastructure to visit us from 19/01 to 21/01/2019.

As you know, Deltares (<https://www.deltares.nl/en/>) is a world leading independent institute for applied research in the field of water, subsurface and infrastructures with six areas of expertise: a) flood risk management, b) ecosystems and environmental quality, c) water and raw materials, d) building in the delta, e) adaptive delta planning and f) enabling technologies.

During your stay we'll discuss about the establishment of a collaboration between Deltares and Fuzhou and regarding a possible common research project on "Resilience of Infrastructures subjected to extreme events, including earthquakes and flood".

I shall be looking forward to your positive reply.

With kind regards,

ing. A.T. Aantjes
Manager
