

IUPUI

SCHOOL OF SCIENCE

Department of Computer and Information Science

Dec. 8, 2018

To Mr. Yi Lin
College of Physics and Information Engineering,
Fuzhou University, China

Dear Mr. Lin:

It is my pleasure to invite you to the Department of Computer and Information Science at the Indiana University-Purdue University Indianapolis (IUPUI) as a Visiting Scholar to conduct research in Study on Human-Computer Interaction based on Mobile Augmented Reality, which is also interested by several faculty in our Visual Information Sensing and Computer Center. Your visiting position with us will be for a period of one (1) year starting March 30, 2019. Your academic supervisor in this period is Prof. Jiang Yu Zheng. We will provide necessary working conditions and help you establish collaborative work with our team on mutual research interests. We understand that your visit will be completely supported by the Chinese Government (under the funding support of China Scholarship Council scholarships during March 30, 2019- March 29, 2020), and we will not offer any financial remuneration for this position. You will be responsible for your own living expenses, health insurance and travel expenses to Indianapolis, and back to China. You will be expected to participate in the research activities at Dr. Zheng's Lab, and will be expected to publish peer-reviewed research papers resulting from your collaborative work here. Dr. Zheng will provide mentoring to you. You will be provided space within our shared office areas and we anticipate that you will be accessible during normal office hours. I am sure that you will find the environment stimulating and resourceful. Your visit will also be important to promoting the relationship between your university and IUPUI. We are delighted at prospect of having you as a visiting scholar at IUPUI. If you have any further questions or concerns, please feel free to contact me. I look forward to seeing you at IUPUI.

We wish your stay and participation in our research activity will create new tools, methods, and systems that benefit to our health, working, and daily life.

Sincerely,

Jiang-Yu Zheng Professor,
Department of Computer and Information Science,
