

Invitation letter

Dear Yiwen Ma,

It is a pleasure to invite you to join my research group at the Ulsan National Institute of Science and Technology (UNIST) in Korea from May 9th 2019 to August 6th 2019 (90 days) for collaborative work. The research topic is focused on "Photoelectrochemical Decomposition of Water and Reduction of Carbon Dioxide" and you will perform the scientific experiments with the members of my research group. We will provide the necessary research conditions during your stay in Korea. Your cost in Korea will be covered by the fund of Excellent Youth Exchange Program of China Association of Science and Technology.

I look forward to welcoming you in our laboratory, as I am sure that both of us will substantially benefit from this collaboration.

Signature

A handwritten signature in black ink, appearing to read 'Jae Sung Lee', is written over the 'Signature' label.

Prof. Jae Sung Lee
